prettier

1) Markdown Reference Link: Non compliance with common mark case change and preceeding space removed

2) Prettier incorrectly formats an IIFE with JSDoc

3) markdown: underscores in inline code mess with emphasis _ ..._

4) Code-breaking semicolon added when formatting range in arrow function with comment

5) Prettier parses ({ methodName() }) incorrectly

6) Support for continuation indent in HTML (when bracketSameLine is true)

7) CSS: Using @supports (not ...) results in invalid CSS code

8) RFC: Enable a comment hint to format objects as "tables"
