p5.js

1) Script Error
2) SaveFrames() misses some frames
3) Frame Rate significantly higher than target on high refresh rate displays (>200Hz)
4) Can't render sketch if included p5.sound.min.js in Index.html header
5) information on reference page about displayWidth seems not correct
6) Library functions registered with registerPreloadMethod keep calling _incrementPreload after preloading is done.
7) Suggestion: include an error message when drawing shapes with NaN values.
8) Add dashed lines to the core API
